Experience Summary

Overall Number of Years of Experience: 2 Years 2 Months.

Organization Served	Month & Year		Role	Specialization Area
	From	To		
L & T Technology Services	Sep -2020	Dec-2020	Intern	**HTML, CSS, ReactJs, JavaScript, C#**
L & T Technology Services	Jan -2021	Feb-2022	Associate Engineer	C#, Angular, **ReactJS, JavaScript, ContexAPI, ANTD**
L & T Technology Services	Feb -2022	Present	Engineer	C#,WPF,**ReactJS, JavaScript, Redux**

Educational Qualifications				
	PhD	Masters	Bachelors	BSc/ Diploma
Branch			Computer Science	
University / Institution			KIIT University	

Certifications				
Name	Issuing Organization	Issue Date	Expiry Date	Credential URL
Programming with JavaScript	Meta	Jul-2022	None	Link
Introduction to Front-End Development	Meta	Jul-2022	None	Link

Skills Summary			
Sl No	Technology Skills	Domain Skills	
1.	WPF, C#	Window Application Development	
2.	Selenium, Robot Framework	Automation Testing	
3.	**ReactJs, JavaScript, HTML, CSS, Node, Redux, ANTD**	Front-End Development	

Project Experience Summary				
Sl No	Project Name	Duration in Months	Team Size	Project Brief description
1	Battery Manager (Windows Solution)	Present	5	Enable 3rd party developers (e.g. EMM's, ISV's etc.) to access the battery State of Health [SOH] value so that they can build a tool, etc. to support IT [web-console based] needs. Developers and EMM's would like to offer monitoring tools that can track the SOH of their customers deployed batteries so that they can determine when it is time to order more or when they should retrieve the battery to replace it to prevent an old/poorly performing battery from interrupting a worker shift due to a device battery not lasting.
	Role Performed	Technologies involved	Tools worked on	Any additional Details
	Developer	C#, .net Framework, ReactJs, Firebase, Javascript, Context API, ANTD	Windows Registry, Windows Services, Visual Studio	

Project Experience Summary				
Sl No	Project Name	Duration in Months	Team Size	Project Brief description
2	Android N OS	6	5	This is a Web Based Application which tracks, stores and performs Android and Patch Updates for its registered Users across the organization.
	Role Performed	Technologies involved	Tools worked on	Any additional Details
	Frontend Developer	**ReactJs, CSS, HTML, JavaScript, NodeJS**	Visual Studio Code,	

Project Experience Summary				
Sl No	Project Name	Duration in Months	Team Size	Project Brief description
3	MSI Tools app support (Motorola)	9	13	This project use cloud native & windows-based software package used to configure Motorola radios in two-ways. It allows user to program one radio at a time. The APX models are customer-facing through the APX CPS and RM Template Mode, while the APX NEXT models are currently facing through the radio Central application.
	Role Performed	Technologies involved	Tools worked on	Any additional Details
	Developer	C#, WPF, .net Framework	Visual Studio 2019
